

PRESS RELEASE

For Immediately Release

February 25, 2019

P2 Mobile Technologies Limited announced today the launch of a new corporate brand name and tagline and will now be known as **Anywhere Networks**. Among the other changes will be its logo, tagline and domain name (www.AnywhereNetworks.com)

P2 Wireless and Anywhere Networks are brand names owned by P2 Mobile Technologies Limited. While we have migrated the BRAND NAME from P2 Wireless to Anywhere Networks, our LEGAL ENTITY NAME remains the same. There is no change in company name in any legal documents.

Legal Entity: P2 Mobile Technologies Limited

Brand Name: Anywhere Networks

The rebranding is part of our mission to deliver even better services and solutions to our customers - by providing intelligent connectivity for Smart Cities, Safe Cities, Transportation networks and Industry environments. Our extraordinary software, Anywhere Operating System, enables highly scalable, intelligent mesh networking.

Including a new tagline ("Intelligent Connectivity"), the rebranding is part of our mission to deliver even better services and solutions to our customers - by providing intelligent connectivity for Smart Cities, Safe Cities, Transportation networks and Industry environments. Our extraordinary software, Anywhere Operating System, enables highly scalable, intelligent mesh networking. Anywhere Networks underwent a strategic reorganization early last year to better leverage its business; it moved its corporate headquarters to Hong Kong to increase available service space for clients and centralize operation in Hong Kong.

About Anywhere Networks

Anywhere Networks develops and globally markets network infrastructure solutions and services for Smart City applications with focus on public safety, intelligently connecting IoT devices and video surveillance cameras for public and private customers. Anywhere Operating Systems, A-OS, and Anywhere Network Nodes, A-NN, offer scalable, high-capacity, secure network solutions based on Anywhere's Intelligent Networking Technology for bandwidth-demanding applications and mission critical network infrastructure. Anywhere Networks solutions and services are well suited for public safety and video surveillance applications for Smart Cities, Safe Cities, Transportation Networks, and Industrial Environments.
